

# HOSTING & CONNECTIVITY

## Design

Fluent's Hosting & Connectivity solution focuses on ultra-low latency, through its presence in data centers around the globe. (NY, NJ, Chicago, Seattle, Tokyo, Hong Kong, London). Fluent can host any part of your environment including algorithms, hardware, back/middle/front office needs, market data, feed handler, risk management, monitoring and connectivity, or any desired combination. Built with the latest and most advanced networking gear, Arista switches and using fiber connectivity, our infrastructure is highly resilient, very scalable, and fully redundant. Our closed network provides the highest level of security and our bandwidth has dedicated channels for each client. Via our Solace integration our data is available from any point within our environment. Fluent supports 1 GigE, 10 GigE, 40 GigE and microwave connectivity. We are connected to more than 60 liquidity providers globally including all the major exchanges and ECN's.

## Value

Fluent's Hosting and Connectivity infrastructure is built for speed and stability. Fluent's edge in the marketplace resides with our abundant experience in designing and managing data centers and hosting sites. Fluent's connectivity to 60+ liquidity providers around the globe including all major exchanges provides our clients access to virtually all liquidity sources. Our ability to host your hardware within our cages globally, providing power, cooling, security, and 24/7 monitoring enables you to focus on your business' core activity. Only Fluent's clients can access our infrastructure securely with a specified user name and password. Fluent continues to invest in the latest and most advanced hardware and software solutions, in order to keep our clients ahead of the current trends in the marketplace. Our hardware and software solutions are designed to on-board new clients within days rather than the typical weeks as is common in the industry. Our versatility allows for innovative latency reducing scenarios which we continuously deliver to our clients.

## Key Facts

- **Data Centers around the globe**
- **60+ liquidity providers**
- **Multiple connectivity options including Microwave**
- **Ultra-low latency and closest proximity**
- **Latest cutting edge hardware and networking gear**
- **Data center design and management expertise**
- **Short on-boarding time for new clients**
- **All data available from any point around the globe**

# HOSTING & CONNECTIVITY

- Global Secure Network (Private and Protected lines)
- Ultra low Latency between sites and from sites to local LP's
